Field interaction

Activity Overview

Connecting with people during a field-based selling activity

Purpose of the activity

- Engage with people directly in the field.
- Present the product and communicate its price clearly.
- Practise confidence, communication and customer interaction.
- Record the cost price and selling price for a simple pricing review.

Pricing Summary

Cost price and selling price provided for the activity

TOTAL COST PRICE	SELLING PRICE	PROFIT / LOSS
₹48	₹48	₹0

Profit / Loss = Selling Price − Total Cost Price

₹48 − ₹48 = ₹0 • The selling price equals the total cost price.

Calculation & Key Learning

Understanding the result of the pricing activity

PRICE CALCULATION

Selling Price	₹48
Total Cost Price	₹48
Profit / Loss	**₹0**

No profit and no loss at this price.

Key learnings

- Pricing should account for the total cost.
- Clear communication helps customers understand the offer.
- Comparing cost price with selling price shows the outcome.

Field Activity Highlights

Photo documentation of customer interactions

Conclusion

The total cost price and selling price were both ₹48.

Therefore, the activity shows a break-even result: no profit and no loss.

Thank you
